1 GB
)

“ I just set up Pixelfed myself. I’ve got it running on a 1GB Linode. Would definitely recommend at least 2GB RAM, because mine is using swap like there’s no tomorrow.

Processor wise, one core seems to be OK. My load averages are 0.11-ish.

Linode 1 GB CPU Nanode 1 GB (\$5/mo.)
RAM 1 GB, CPU 1 core, 25 GB
